

**Question:** Which of the following physical theories never requires regularization at high energies?

- A. Superstring Theory
- B. Classical Electrodynamics
- C. Quantum Electrodynamics (QED)
- D. Quantum Chromodynamics (QCD)

**Correct Answer:** A

Model 1

Output 1: ... , the final answer is A

Output 2: ... , the final answer is A

Output 3: ... , the final answer is A

Confidence: 100%

Model 2

Output 1: ... , the final answer is A

Output 2: ... , the correct choice is B

Output 3: ... , I think the best answer is B

Confidence: 67%

Model 3

Output 1: ... , the final answer is A

Output 2: ... , the correct choice is B

Output 3: ... , I think the best answer is C

Confidence: 33%
